SKILLS

- **Technical Skills:** Python, Java, R
- **Web Development:** HTML, CSS, JavaScript, MERN
- **Tools & Technologies:** MongoDB, Git, Excel
- **Soft Skills:** Problem Solving, Strategic Planning, Leadership, Team Collaboration, Adaptability

EXPERIENCE

Software Engineer Intern – Voix Nova | Bengaluru, India

Sep 2025 – Dec 2025

- Worked as a Software Engineer Intern focusing on front-end development and software maintenance.
- Developed responsive and user-friendly UI components using modern web technologies.
- Performed testing, debugging, and bug fixing to improve application performance and reliability.
- Collaborated with team members on AI-related projects and coordinated feature integration.
- Maintained existing applications and assisted in improving system functionality

PROJECTS

Crop Disease Management

- Developed a machine learning-based system to detect crop diseases from leaf images.
- Applied image classification techniques to identify plant diseases and suggest preventive measures.
- Designed a simple interface to help farmers detect issues early and improve crop yield.

Notes Keeper App

- Built a MERN-based notes management application.
- Implemented features to add, edit, and delete notes.
- Used MongoDB for database storage and React for a simple user interface.

EDUCATION

- | | |
|--|---------------------|
| • RNS Institute of Technology – B.E. in AIML | Current CGPA – 8.63 |
| • Kumarans PU College | Percentage – 94.4 |
| • Jyothy Kendriya Vidyalaya | Percentage – 89.4 |
